**Year 3** - In Year 3, the children have been looking at rainforests in Brazil and the key aspects of the tropical climate.

Rainforest Weather Forecast

Location Name	Average Rainfall (per month)
Maceio, Brazil	22cm
Average Temperature (Day)	Average Temperature (Night)
28°C	20°C
Windspeed	Humidity
12mph	80%

Now you're ready to prepare your forecast. Decide:

- who will announce the forecast,
- what facts you will share with the class,
- who will read each section,
- where you will need to point on the map,
- how you will sum up your forecast.

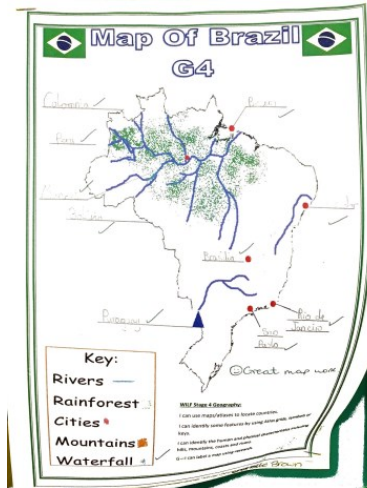

Where is your city located? Mark it on this world map so you know where to point when you give your forecast.

Explain the top aspects of a tropical climate.  
I can describe what the weather is usually like in tropical climate.  
I can tell you the difference between weather and climate.

Forecasting my news in Belle and I am going to tell you about the weather in the Amazon Rainforest. Today the weather is going to be hot and a little windy. Tomorrow it is going to be almost a storm. That is it for today good bye ✓

Amazon Rainforest ✓
