Dear Child in 2030

I am writing to you to tell you how boring 2020 has been. I think you have heard of covid but I'll tell you how ridiculous it was for kids.

I'll start at the start. It started with China where it is said some one ate a bat. After it spread in China it quickly came to the UK so our prime minister Boris Johnson sent us into lock down for 6 months. I was looking forward to it because it was March and it was boiling so most of the time we were outside. Once we came out of lock down, every one had to wear masks. We started to go to school but we had to social distance (its where you keep 2 meters apart). Soon after, we went into lock down again but unfortunately it was winter so we could not go outside! At Christmas we were only allowed only two families to come to our house. Due to us being in lock down, we couldn't go to different countries especially Italy. We were looking forward to our uro camp (the pictures looked great) but we couldn't go. Sadly our holiday was canceled. My mum had to work at home so the first lock down we stayed at home but our second lock down we ~~went~~ went to school Wednesday, Thursday and Friday. On Monday and Tuesday, we still had to learn but on Google class room. Now were in a nother lock down.

So we're stuck in our house again. I hope 2030 is amazing. I hope you liked reading this. Are we saving the planet? What games are they? Does every one drive electric cars?

Keep safe

From Cooper
